

The vertical mixers of the MVP series are designed to mix large quantities of plastic granules.

The machine has a solid painted-steel structure with 4 supporting legs.

Its mixing screw is driven by a 4-pole three-phase electric motor with V-belt drive.

The material is loaded through a special feeding hopper equipped with a grid acting as protection and support base for bags.

Other standard components are: protective guards, inspection doors, spyholes, material outlets.

The range features dimensions from 500 to 20000 litres.

TECHNICAL SPECIFICATIONS:

- Feeding hopper with protection grid.
- Mixing screw for a "fountain-type" mixing.
- Outlet pipe with butterfly valve.
- Lower door for easy cleaning and emptying.
- Spyhole for checking material level.
- Inspection door on the cylinder (for bigger models only).
- Switchboard with timer.

OPTIONAL COMPONENTS:

- Paddle level sensor to control the quantity loaded.
- Connection for pneumatic suction nozzle.
- Flange for installing a screw/cyclone.
